

When should I replace my child's pump?

By *publisher*

Created 06/16/2009 - 17:08

If my child takes...

2 puffs per day

4 puffs per day

8 puffs per day

Then I need to get a refill in...

3 months

2 months

1 months

For example: If your child takes 2 puffs in the morning and 2 puffs at night, then that is 4 puffs every day. That means your child will need to get a refill in approximately 2 months.

Remember to always have refills before the medicine runs out.
